To Whom It May Concern:

I have had the pleasure of working with Don Brubaker over the last six months on the formation of a business plan dealing with the digitization of medical records for physician practices as part of the American Recovery and Reinvestment Act of 2009. As a former CEO and Executive Director of large single specialty physician groups in the community I approached Don as a technical consultant based on his experience in business analysis, IT architecture and software development. He quickly demonstrated the ability to assimilate the goals and culture of our project, providing analysis and solutions in a timely and cogent fashion.

Don proved himself to be a critical thinker as we wrestled with questions around buy versus build for software and infrastructure. In the case of software development, Don quickly and succinctly provided information in the context of cost, risk assessment and best practices that proved to be invaluable. His ability to speak plain English on complex, technical subjects allowed us to make informed decisions that laid the necessary ground work to approach investors and secure funding.

All in all, Don exceeded my expectations and I consider Don to be my "go to" guy as this business expands and requires additional technical expertise. It is for these reasons that I offer my highest recommendation for Don Brubaker without reservation. If you have any questions regarding this recommendation, please do not hesitate to contact me at my private email address, dmalie@bellsouth.net or my Google Voice number 904/270-9796.

Sincerely,

Douglas Malie
